

Development area

Positive comments

Negative with reasoning

Negative/Negative

Land S of Norton Road 6	Church extension would be good	No. Surrounding roads too small. Already accident black spots There will be lots of heavy traffic during construction. Only access would be through village	No. Do not need sports facilities
	Yes. Very sensible	Poor road access to this site	Why do we need more sports facilities
	Could be ideal for new primary school	No. Dangerous access	
	Suitable for development. It centralises the village	I disagree with this site as roads are too narrow to take traffic from a housing development	
	Suitable. Maintains continuation of residential area	Traffic concerns No. Access for children to school would be unsafe	No. I live at the bottom of Victoria Close and the field behind the Victoria is adjacent to my garden. I object because they say we are not growing enough food in this country. This is rich arable land. The number proposed is far too many. The field near the church is owned by Mr Myatt and he has given part of this field to the church as an extension of the cemetery so the developers cannot have all the field and who wants a nice house built next doo to a cemetery. Fifty years ago this field was a tip and there are rats and all sorts of rubbish in there. Access is not the problem. I have lived here for 30 years and this is the third application for building on this field
	Yes. Close to other existing development. Extension of cemetery required	No. Norton Rd not suitable for extra traffic	

	Good site and position	No. Road access problem. Too large a development; outside village at moment	
	Yes, but size and traffic are concerns	No. Too much burden on minor roads	
	Yes but need low density. Could be bungalows as backs on to bungalows	No. Appalling access on already extremely dangerous narrow roads	
	Yes. Almost an infill. Poor land but good position	No. Not a good place. Small roads	
		This is not good as too big an area for the infrastructure to cope and it will result in gridlocks on the roads. Small development sites are more preferable	
	Yes, this development would centralise the village.	No. Access roads already heavily used by school traffic – too dangerous	
	Yes. Good position and design of site	No. Needs to be nearer to town side of village and closer therefore to A14	
	Yes. Near to school and retail facilities.	Ruins the section of the village Dangerous and wrong for the village
